QuikSnap Crack + [Latest 2022]

QuikSnap Crack is a easy-to-use application that turns any FTP or SFTP servers into a backup location for screenshots you take. Available in two editions: QuikSnap Pro - provides a number of advanced features and functions to easily allow you to upload your favorite snapshots from any screen region or desktop with a single click. QuikSnap Lite - enables you to take screenshots from the currently opened application window and upload them to your FTP server through a simple and intuitive interface. QuikSnap allows you to easily and effortlessly share and backup your favorite screenshots. QuikSnap Description: QuikSnap is a small tool that turns any FTP server into a backup location for screenshots taken with the computer's built-in camera. Notes: License : Shareware (Free Trial) Developer : LifeCoders, Inc. License : Shareware (Free Trial) Edition : Pro License Type : Free download 0 Freeware Screenshot Buddy 2.6.0.6 Screenshot Buddy is a compact application that turns your computer into a digital camera. When you install the program on your system you will be able to take a snapshot with just a click of a button. It will remember the last taken and the best screenshots and automatically send them to the designated FTP server. All you have to do is select the folder, and wait for the job to complete. The program allows you to do more with your computer's built-in camera. Since you will be able to save snapshots right from the application, no FTP connection will be required. In addition, you will be able to upload pictures to your web page with a single click, enabling you to share your pictures on your website and make them available for viewing by others. You can create new groups for sharing your pictures, create custom folder names for them and arrange them in the form of a list. Screenshot Buddy Description: Screenshot Buddy is a compact application that turns your computer into a digital camera. 0 Freeware Screenshot Grabber 1.3.0.1 Screenshot Grabber is an extremely small application, which doesn't require a lot of system resources. However, it provides a really cool tool that allows you to quickly backup photos you take of different screen regions. You can configure the program to automatically take screenshots after you have maximized, minimized or moved a window. The application takes screenshots from the area you select, stores them in a specific folder and sends the URL of the snapshot to

QuikSnap Crack + [Updated] 2022

Capture all the things in the world of two-three mouse clicks, select screen regions or even the whole desktop, take screenshots and upload them to your FTP server. Screenshots are generated in seconds, thanks to a streamlined interface. Even the best screenshots are improved with Quickly's built-in theme engine. Take screenshots of your desktop Take screenshots of a window, screen regions or even the entire desktop. Thumbnails, GIFs and PNGs are generated with the simple click of a button. Capture screenshot areas You can configure the tool to take screenshots of area-specific segments of your screen. Create screen captures of only portions of your desktop or focus on a specific application by selecting the monitor area. Upload screenshots to FTP server Once a screenshot has been captured, the tool automatically connects to the FTP server and uploads it to a folder you have chosen. If you want to back up all the screenshots you take and upload them to a remote FTP server, you can choose to automatically perform this operation on the next screenshot. How to take screenshots: Select the "Take Screenshot" option from the context menu. Drag and drop the mouse to capture a screenshot Click the image to open it in the default photo editor and save it under a desired name. Screenshot settings: You can choose how the screenshot is named. Create a gallery: Open the folder that will contain the screenshots in the default image viewer. Click the "Create a gallery" button. Select a folder location and a folder name. Select an image format for the gallery. You can choose between PNG, GIF or JPG. Utilizing a Remote FTP server Select the "FTP connection" option from the context menu. Click the URL of the FTP server. Enter your desired username and password. Bonus uses of QuikSnap: Upload screenshots to FTP server with the click of a button Once a screenshot has been taken, the tool automatically connects to the FTP server and uploads it to a folder you have chosen. If you want to back up all the screenshots you take and upload them to a remote FTP server, you can choose to automatically perform this operation on the next screenshot. Take screenshots of application and upload them to a remote FTP server If you want to take snapshots of an application, select the mode from the context menu, then drag and drop the mouse to take the desired screenshot. Take screenshots of an area of a69d392a70

The launcher includes two unique features: using this launcher, you can see 3D effects

What's New in the?

Quickly take and upload screenshots to your FTP server. Take snapshots of the currently opened window, selected screen regions or even the whole desktop, generating PNG, GIF or JPG images. The entire operation is hassle-free, since all you have to do is select the snapshot mode. Once the upload is complete, the application displays a notification message near the system tray and the picture URL is sent to the clipboard for easy sharing. Share screenshots with others without having to copy to your local folder. On the downside, the application does not enable you to define a local folder on your computer where the screenshots will be copied to, so you will have to settle for the FTP copy. Screenshots - By taking screenshots, you are saving the current state of your desktop, documents and other applications for a later restoration. By uploading them, you make them available to be retrieved from any device, anywhere. *NEW* Snapshot capture mode is changed to action and can be toggled on or off. *NEW* The large mode (screen capture) is selected automatically, in addition to the smaller (cursor) mode. *NEW* Snapshots created will have a.1 extension added, this is to make sure they will be recognized in windows explorer. *NEW* Can now use Global shortcut to take screenshot. *FIX* Can now use shell integration to take screenshot. *FIX* Could not connect to FTP (Dropbox) in some rare cases. *FIX* Could not send screenshot to FTP (Dropbox) in some rare cases. *FIX* The shortcut icon did not show in some cases. *FIX* The ETA was not working in some cases. *FIX* Uploading failed in some cases. *FIX* Snapshots made using print screen key combo could not be uploaded. *FIX* The "Protect Filename" option was not working in some cases. *FIX* The "Protect Filename" option was not working in certain cases. *FIX* The "Protect Folder Name" option was not working in some cases. *FIX* The "Protect Folder Name" option was not working in certain cases. *FIX* The program crashed in some cases when choosing "My Computer" as destination for uploading to FTP. *FIX* Updated the program's logo image. *FIX* Translated text in the program's tray menu. *FIX* Updated translations. *FIX* Windows 10 Anniversary Update
